Q: I heard that a Greek Fraternity got in some trouble last year... What kind of Risk Management techniques do they have?

P&M: First and foremost, congrats on being well informed about your university and applying it to your major... University Greeks have an organization that sends them a set of guidelines to follow, known as FIPG. The letters FIPG have become well-known throughout the Greek community. It is clear that their one-page risk management policy has become the standard for nearly every Greek Organization. But FIPG has much more to offer than a risk management policy. Their goal is to be the one-stop resource for risk management education, beginning first with our member organizations, but eventually extending to undergraduates and college and university professionals. You can find more info at: www.fipg.org
