

Make this fortune teller to amaze your friends with your prescience and wisdom! Just follow these simple instructions, using the various printed guidelines to make folds.

First, cut off this section, following the solid black line. You should have a square. Fold the square along the longest diagonal dotted lines; these will act guides for later folds.

Next, fold the paper away from you as decreed by the four shorter solid diagonal black lines. After this step, the four (formerly) corners of

the paper ought to be in the center, facing away from you.

Next, fold the corners of the square towards you, following the dotted lines.

Fold the square in half laterally, *not* along the diagonals.

Slide your thumbs and index fingers into the folds of paper, bring the tips of your fingers together, Hooray, you now have a fortune teller.

How to tell fortunes to people:

- 1) Have a friend choose one of the words on the 4 flaps. Spell out that word while moving your thumbs and index fingers back and forth in alternating directions.
- 2) Have your friend choose one of the numbers that they see. Count out that number while moving your thumbs and index fingers back and forth in alternating directions.
- 3) Have your friend choose another number that they see. Open the large triangle and read the fortune that corresponds to the number that they chose.
